

TikTok Engineering Software Engineers Virtual Hiring Event Singapore

About the TikTok Engineering Team

TikTok is one of the fastest growing apps in the world, and we are building up the engineering team for our core TikTok product in Singapore to support that growth and contribute to the company mission. You will be working alongside world-class engineers in this team to build attractive and reliable features, with the goal of delivering the best product experience to all our users while ensuring the utmost in privacy protection.

We are looking for talented software engineers to join our driven and innovative teams in Singapore. Join our Virtual Hiring Event and fast-track your application process when you apply with us from May to July 2022!

Here is how we fast-track hiring

There will be one call to assess your suitability followed by an online assessment. What's next is a fast-tracked interview process that takes place every 2 weeks. All interviews are conducted on the same day by our hiring managers and teams to expedite the decision process. There will be two or three rounds of back-to-back interviews, which may involve live coding segments. The number of interviews depends on the role and the team. What is sure is that by the end of the day, you will know the outcome of your application!

Offer

Who are we looking for?

- ✓ **Bachelor's or master's degree in computer science or related major**
- ✓ **Proficient in at least one of the following languages: Go, Python, Java, C++**
- ✓ **We welcome candidates at any experience level. Experience in building backend services for large-scale consumer-facing applications will be a plus**

TikTok will be prioritising applicants who currently have a right to work in Singapore and do not require TikTok's sponsorship of a visa.

Our hiring teams

Global Live Streaming

Wallet

The Wallet team provides users with the capability to safe keep their virtual assets.
